#SoCalAFP EXPO Speakers,

We will be using Slido for all sessions at the 2024 #SoCalAFP Expo! This means you can incorporate the following features LIVE into your presentation,

- Multiple choice polling
- Audience quiz
- Open answer questions
- Ranking
- Audience Q&A

It is simple for attendees to use. Either follow the QR code or attendees enter your session code at slido.com and immediately have access to active polls or ask a question virtually.

It is easy for presenters as well, just activate a poll for attendee feedback, then click the present button to immediately show results real time on the screen for everyone to see.

If you aren't familiar with Slido, you can view a 2 min. tutorial of features at https://youtu.be/iLLS-43c4vg.

This is completely optional. It is easy to build polling questions into your presentation. Just send us the polling questions **by NOON on Monday, December 2nd** and will build this into your slides. The AV team will run all features of Slido during your presentation. No tech needed from speakers!

As a reminder, you must use the conference PowerPoint template for all slides.

You may be wondering how #SoCalAFP will be introducing the use of Slido at the start of the EXPO, here is an example for reference. https://youtu.be/msVFcrBEU1M

This is meant to build audience engagement and provide additional tools for you to enjoy. This isn't meant to cause stress. If you don't find this to be helpful, please opt out and continue with your presentation as planned. Added benefit for those interested, and no response necessary for those who aren't.

Please feel free to reach out if you have any questions or would like to begin building Slido into your presentation.

All the Best,
Your Conference Planning Team
